

In the Claims:

Kindly amend the claims as follows:

1. (CURRENTLY AMENDED) A system and method of online memorial creation, comprising:

- a first stable station on the Internet for a user to create a living memorial of him or herself;
- a second stable station, linked to said first stable station, on the Internet for a user to create a memorial of a deceased person or persons;
- a third stable station, linked to said first and second stable stations, on the Internet for live web casting of a funeral or memorial services;
- a live time chat function, linked to said first, second and third stable stations, for users to talk to each other and communicate over a variety of subjects;
- a media file storage facility, linked to said first, second and third stable stations, to allow users to store video, audio or data files; and
- Web-crafting tools incorporated in said first, second, and third stable stations, allowing a user or users to create sites about themselves or others.

2. (CURRENTLY AMENDED) A system and method of online memorial creation as in claim 1, wherein said first stable station has a means for a user to set up an account and enter personal information in data, video or audio format, for other authorized users to access during the ~~user's~~ user's life or after the users death.

3. (ORIGINAL)A system and method of online memorial creation, as in claim 1, wherein said second stable station, allows a user to set up an account to enter information on a

deceased person, including any biographical information, in data, video, or audio files, for other authorized users to view.

4. (ORIGINAL)A system and method of online memorial creation, as in claim 2, further comprising a calendaring system to allow authorized users to enter important dates regarding the deceased person, such as visitation or funeral services as well as other important dates, such as birth date, death date, and anniversaries.

5. (ORIGINAL)A system and method of online memorial creation, as in claim 2, further comprising a live web casting of visitation, memorial, funeral or graveside services for authorized users to view in real time, or at a later date, if they cannot physically be at these services.

6. (ORIGINAL)A system and method of online memorial creation, as in claim 2, further comprising links to local florists and charities which can be used by authorized users to commemorate the deceased.

7. (ORIGINAL)A system and method of online memorial creation, as in claim 2, further comprising a bulletin board system for authorized users to leave messages for family's members of the deceased.

8. (ORIGINAL)A system and method of online memorial creation as in claim 1, further comprising a live video and audio feed to a gravesite of the deceased, or to a favorite place of the deceased.

9. (ORIGINAL)A system and method of online memorial creation, as in claim 1, further comprising a means for a spanning memorial to be set up for a group of persons as victims of a tragedy.

10. (NEW) A system and method of online memorial creation, comprising:

a first stable station on the Internet for a user to create a living memorial of him or herself;

a second stable station, linked to said first stable station, on the Internet for a user to create a memorial of a deceased person or persons;

a third stable station, linked to said first and second stable stations, on the Internet for live web casting of a funeral or memorial services;

a live time chat function, linked to said first, second and third stable stations, for users to talk to each other and communicate over a variety of subjects, wherein said live time chat function is a condolence chat which can put family members in touch over large distances in real time;

a media file storage facility, linked to said first, second and third stable stations, to allow users to store video, audio or data files; and

Web-crafting tools incorporated in said first, second, and third stable stations, allowing a user or users to create sites about themselves or others.

11. (NEW) A system and method of online memorial creation as in claim 10, wherein said first stable station has a means for a user to set up an account and enter personal information in data, video or audio format, for other authorized users to access during the user's life or after the users death.

12. (NEW) A system and method of online memorial creation, as in claim 10, wherein said second stable station, allows a user to set up an account to enter information on a deceased person, including any biographical information, in data, video, or audio files, for other authorized users to view.

13. (NEW)A system and method of online memorial creation, as in claim 10, further comprising a calendaring system to allow authorized users to enter important dates regarding the deceased person, such as visitation or funeral services as well as other important dates, such as birth date, death date, and anniversaries.

14. (NEW)A system and method of online memorial creation, as in claim 10, further comprising a live web casting of visitation, memorial, funeral or graveside services for authorized users to view in real time, or at a later date, if they cannot physically be at these services.

15. (NEW)A system and method of online memorial creation, as in claim 10, further comprising links to local florists and charities which can be used by authorized users to commemorate the deceased.

16. (NEW)A system and method of online memorial creation, as in claim 10, further comprising a bulletin board system for authorized users to leave messages for family's members of the deceased.

17. (NEW)A system and method of online memorial creation as in claim 10, further comprising a live video and audio feed to a gravesite of the deceased, or to a favorite place of the deceased.

18. (NEW)A system and method of online memorial creation, as in claim 10, further comprising a means for a spanning memorial to be set up for a group of persons as victims of a tragedy.

19. (NEW) A system and method of online memorial creation, as in claim 10, further comprising a means for a spanning memorial to be set up for a group of persons as victims of a tragedy.

20. (NEW) A system and method of online memorial creation, as in claim 10, wherein said live time chat function is a condolence chat which can put family members in touch over large distances with pastors, rabbis, or other grief counselors in real time.

21. (NEW) A system and method of online memorial creation, as in claim 10, wherein said live time chat function is configured to be used specifically for a funeral where no one grieving party is required to be in the same physical location as the deceased.

22. (NEW) A system and method of online memorial creation, as in claim 10, wherein said live time chat function is a condolence chat wherein said grieving parties are not required to be in the same physical location as each other, the pastors, rabbis, grief counselors or the deceased.
